

World Education Reform Database Overview

The **World Education Reform Database** is a collection of more than 10,000 changes to school systems reported by 189 countries and territories, mainly since the 1970s. Reforms are defined as planned, systemic, and non-routine changes to education. Examples include laws, acts, policies, plans, strategies, and other self-identified changes related to education. This brief was produced using version 1 of the data.

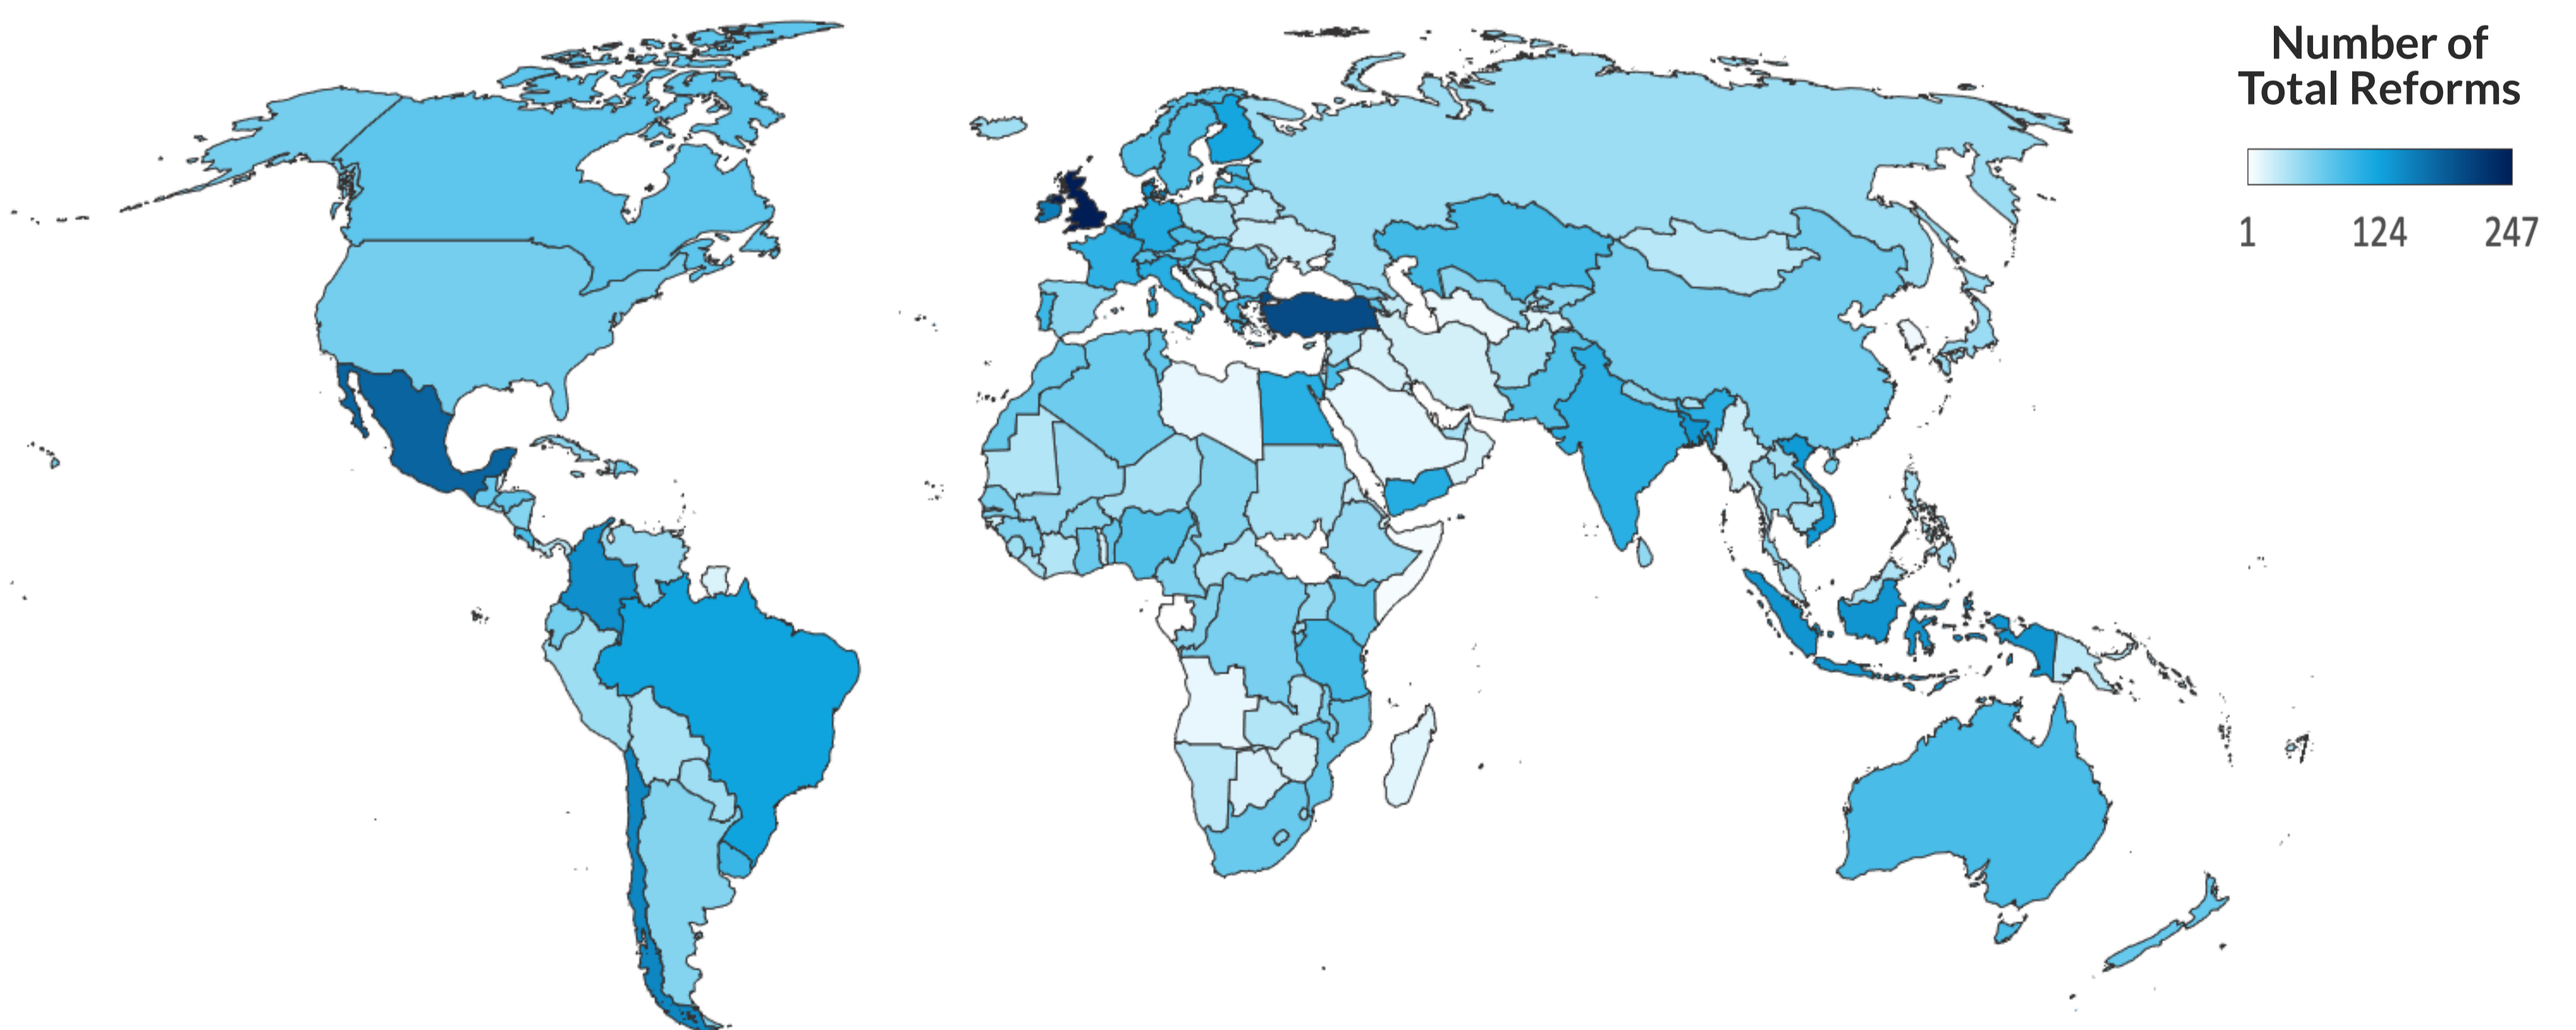

For more details and data see: <https://www.werd.stanford.edu>

Global Trends in Education Reforms

Note: This figure represents a total of 9,047 reforms across 188 countries between 1970-2021.

Global Map of Education Reforms
